

I work with six business owners who have big sales and empty pockets, to build businesses where **the money stays**.

Our goal is simple: in 90 days, you know your breakeven, keep at least 10% net income every month, and pay yourself first, with your own Numbers Navigator sending you your numbers every morning.

For years the financial statements of more than 20 companies crossed my desk every month, and I headed the accounting of all of them, and the same thing showed up again and again and again: big sales, a busy owner, and nobody who could say the breakeven. And so the money came in, and the money went out, and the owner was the last one paid. Painful.

"*Malaki ang benta, bakit parang wala pa rin?*" (Sales are big, so why does it feel like there's nothing?) You work harder every month, and it still doesn't move. Everyone in your business gets paid except you.

Why not just keep doing what you're doing?

Your bookkeeper or accountant	Tells you what happened, after it happened, for the BIR. Not what to do on Monday.
Another hype program	Sells you a platform and disappears when the onboarding cheque clears.
A spreadsheet on your own	Started on a Sunday, abandoned by Wednesday.
The Money That Stays Method	Your actual books, three times a week, for 90 days. Then a system that keeps showing you the numbers after we finish.

The plan is simple.

- 1 Numbers You Trust (days 1 to 30).** We work on your actual books. We find your breakeven, rank what you sell so you see your top earners, and find where the money leaks out. Then we stop the leaks, and the cash you recover goes toward paying for the program.
[The Breakeven Map](#) · [The Top Earners Rank](#) · [The Leak Stop](#)
The win: your breakeven, your top earners, and your first leak stopped, by day 30.
- 2 Profit You Keep (days 31 to 60).** Profit stops being leftovers and becomes a line you pay first. The day money comes in, your profit is set aside before any bill is paid. Every peso gets a job before it is spent. Then we build the weekly habit that keeps it there, even in a slow month.
[The Profit Set-Aside](#) · [The Peso Plan](#) · [The Weekly Money Check](#)
The win: at least 10% net income set aside, every month, by day 60.
- 3 Pay You Take (days 61 to 90).** You go on the payroll. You set a real salary and pay it on a fixed day, like any employee. Then we install your Numbers Navigator, your own AI system that sends you sales, cash, and net income against breakeven every morning, so it keeps working after we finish.
[The Fixed Salary](#) · [The Morning Numbers](#) · [The Numbers Navigator](#)
The win: a salary you pay yourself on schedule, and your numbers every morning, by day 90.

Here's how we work, every single week.

Numbers Mondays We read last week on your actual books: sales, costs, cash, and any new leak.	Build Wednesdays We build your Numbers Navigator and fix one thing, with accountability.	Payday Fridays Profit set aside, your salary checked, and next week's one move.
---	--	---

After you graduate.

You graduate at 90 days. Your next three monthly Money Check calls are on me. After those, we go month to month at ₱5,000 for as long as it's working, or you step up to REIGN OS when you're ready.

And you get these bonuses.

A Seat at The Money Table So "I'm not a numbers person" is never the reason you stall.	₱24,499
Three Monthly Money Check Calls after graduation So "What if it slips back after?" is never the reason you stall.	₱15,000
Clarity Intensive: Personal Voice So "My life is too messy to start" is never the reason you stall.	₱125,000
Your Numbers Navigator, yours to keep So the numbers keep coming every morning after day 90.	Included
Total bonus value	₱164,499
Easy to start. Quick to pay for itself. ₱48,000 to get started. ₱50,000 in a month. Then ₱50,000.	₱148,000

For scale: a ₱5M loan at 5% a month costs ₱250,000 in interest every single month. This program costs less than one month of that interest, and Phase 1 is built to find the money you already made before you borrow another peso.

Love it or leave it.

If you do the work and don't have your breakeven, your top earners, your profit set aside, and your own salary on the calendar by day 90, you choose: I keep working with you at no cost until you do, or I refund every peso. Either way, you keep everything we built. Doing the work means attending every session and sharing your books every week.

Real people. Real money.

₱200,000+

One request for quotation became a ₱500,000 purchase order, and I used none of my own capital. I collected first against a supplier credit line.

My first deal · the birth of ARB
Pharmaceutical

A board seat

A client came to borrow ₱5M to ₱10M. I asked to see their financials first and talked them down to a lower rate. They opened their books and invited me onto their board.

BRO Lending client

₱60,000 a month

"Borrowed less, kept more."

[Client name], [business], who came to me for loan advice

This isn't for everyone.

1. You own a business or practice that already makes sales every month.
2. You can't say your breakeven or net income with confidence.
3. You can show up three times a week and share your actual books.
4. You're ready to pay yourself first, even when it feels uncomfortable.

If you're not making sales yet, you don't need me yet. Start with a seat at The Money Table, and come back when the sales come in.

Apply for The Founding Six. We start Monday, November 2.

Six seats, because six is how many sets of books I can read properly three times a week. Applications close Friday, October 30. I'll review yours and reply within 72 hours, and if your numbers say you don't need me yet, I'll tell you that too. The founding rate is for these six owners.

Apply for one of the six seats

P.S. Phase 1 finds money you already made, and that is how the program pays for itself.
