

The Circle

Money That Stays. For owners with big sales and empty pockets: know your breakeven, keep 20%, and pay yourself first.

₱1M+

added net income, the goal by
month six

6 owners

six months, one small group

₱500,000

the fee, with the refund terms below

Who it is for: owners with real sales who still cannot tell you what they kept last month.

PHASE	WHAT WE BUILD TOGETHER
1 • No More Guessing Months 1–2	Your monthly breakeven. Business and personal money separated. A one-page P&L you update every week.
2 • Profit Every Month Months 3–4	Your Profit Map: every product ranked by net profit, bottom three repriced or cut. A profit account taking 20% of every deposit. A daily AI numbers report on sales, costs and cash.
3 • Owner Paid First Months 5–6	A fixed owner salary on a fixed date. The 10-minute money check every morning. A 12-month cash plan that keeps 20% net income after we finish.

THE TERMS, IN WRITING

Month 2: by the end of month two, we show you your breakeven and your running profit account. If we cannot, you get the full fee back.

Month 6: do the work. If you have not added at least ₱500K in net income by the end of month six, I keep working with you, free, until you do.

Proof, measured on net income only. My own company, ARB Pharmaceutical, made ₱200K in net income in its first three months. One e-commerce client went from ₱1M a month in net income to ₱6.2M a month within six months.

NEXT STEP

Book a 15-minute fit call. We look at one number together: what your business kept last month. If The Circle is not the right fit, I will tell you on the call.

To book: reply to my message with "CALL" and I will send you two times that work this week.
